**Subject:** URGENT POOL SAFETY

Dear Jeremy & others,

I have been informed that the Lighthouse is full of children on a weekend sports event and that the swimming pool has been unattended and unsupervised, Children were apparently bomb diving into the pool causing the surrounding tiles to be flooded and that the area is a disaster waiting to happen. Apparently Glenn is away on Holidays, Adrian is not there and the reception staff are unable to keep an eye on it as required.

In a similar incident before I took over there was a serious incident where the pool was unattended and someone was admitted to hospital with serious head injuries and nearly died.

Please treat this as Urgent and please call me on my mobile to let me know what's happening as if it goes on the pool area should be closed for safety reasons.

I know you have told me not to discuss with staff any nature of the business but this is a safety issue and common sense needs to prevail. If I have not heard from any of you by 12 am I will call the resort and inform them so appropriate action can be taken

Regards,

Sean Butler
